DETAILED ACTION

During a telephone conversation with George Vlahos on June 15, 2003 a provisional election was made with traverse to prosecute the invention of species 2, claims 6-15.

Affirmation of this election must be made by applicant in replying to this Office action. Claims 1-5 and 16-20 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Objections

The claims are objected to because they include reference characters which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 8 and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 8 is missing the word "A" in the beginning and claim 12 has a period at the beginning of the claim.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 6, 7, 9, 10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 2,460,543 to Spierer. Spierer discloses an ultraviolet ray toilet seat comprising a seat pivotally supported on brackets mounted upon the back portion of a toilet bowl, the seat being constructed of material adapted to readily transmit ultraviolet light (Col 2, lines 6-15). A u-shaped ultraviolet tube is positioned within a recess in the seat and is thus positioned to expose the buttocks of one seated thereon (Col. 2, lines 17-20).

Regarding claim 7, the limitations are related to intended use rather than structure of the device and are given limited patentable weight.

Regarding claim 9, a portion of the ultraviolet tube is positioned at rear of the seat.

Regarding claim 10, the translucent seat is interpreted as a transparent waterproof cover for the ultraviolet light therein.

Regarding claim 12, the ultraviolet light is mounted in a recess on the lower surface of the seat.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 8 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent 2,460,543 to Spierer. Spierer discloses the claimed invention except for two separate lights on

Art Unit: 3739

opposite sides of the seat. It would have been obvious to one having ordinary skill in the art at the time the invention was made to use multiple lights to provide the same exposure as the single ultraviolet tube, since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art. *St. Regis Paper Co. v. Bemis Co.*, 193 USPQ 8.

Allowable Subject Matter

Claims 11 and 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

An examination of this application reveals that applicant is unfamiliar with patent prosecution procedure. While an inventor may prosecute the application, lack of skill in this field usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skilled preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.
